

Logical Fallacies

An argument is a chain of reasons that a person uses to support a claim or a conclusion. To use argument well, you need to know 1) how to draw logical conclusions from sound evidence and 2) how to recognize and avoid false arguments, or logical fallacies.

Logical fallacies are the bits of fuzzy or misguided thinking that often crop up in our own speaking and writing, as well as in advertisements, political appeals, editorials, and persuasive essays.

Assignment: Teach the class about your assigned logical fallacy using a digital.

Requirements:

- Use PowerPoint and create a one slide poster for your assigned logical fallacy.

- Your poster needs to include
 1. A visual representation of the fallacy.
 2. A definition of the fallacy
 3. An example of the fallacy

- Save your poster to teacher share under your name. (Due before next class starts)

- Present to Class (**There might be multiple people assigned to a topic. However, each person is responsible for making his/her own poster. Only one will present to class, but each will receive points for having poster**)

B3 (21)
